# Management and on

on site managers and a useful reference for other  
e more complex, with more rules and regulations,  
i. Site managers must ensure compliance with a host  
igitalisation has both simplified and complicated the  
al requirements, legislation on health, safety, taxation,  
ant, puts pressure on the site management team to  
anding of the implications on project delivery.

nts. It provides a continuation from the Chartered Institute  
g Practice and the work on quality assurance.

on-budget requires good site management, reliable  
isions made on-the-spot to 'solve' unexpected problems.  
e extensive 'hard' technical knowledge, to know  
or wrong, and to have command of 'soft' skills such as  
t. Team working and team leadership are 'tested' by the  
g to deal with a client and design team and a long and

it involves temporary teams, brought together to create  
ncept of a project being a temporary and one-time  
at from operations which have permanent or semi-  
e, site managers need special skills and competencies

ing is at the heart of a management career in  
t and most influential body for construction management  
r to promote the science and practice of building  
ociety. With over 48,000 members, the CIOB is the  
professional.

# Contents

## 1 Site planning, management and production

1.1	Introduction	10
1.2	Site management – art or science?	10
1.3	The characteristics of site management	11
1.4	The book	11
1.5	Industry challenges and the impact site management	12
1.6	References	12

## 2 Managing post-award activities – project planning

2.1	Why plan?	14
	Special issues on job sites	15
	Monitoring and ensuring everyone understands what is happening	16
2.2	The impact of procurement method on planning/scheduling	16
2.3	The site manager's role in project planning	17
2.4	Pre-award meeting	18
2.5	Pre-production schedule	18
	Levels of planning	19
2.6	The weather impact	21
2.7	Scheduling	23
	Planning by default	23
	Location-based scheduling	23
	Schedule reporting levels	24
2.8	Work Breakdown Structure (WBS)	25
2.9	Planning techniques	25
	Gantt charts	26
	Space diagrams	26
	Flow charts	26
	Critical path and network analysis	27
	Line of Balance	27
	Resource planning	27
2.10	Value engineering	27
	Value management	28
	Earned Value Management	28
2.11	Documenting site conditions	29
2.12	Health and safety considerations in the pre-production schedule	29
2.13	Appointment of specialty works/trade contractors	29
2.14	Requests for further information from the specialists and supply chain	30
2.15	Ordering of long lead-time materials	30

2.16	Allocate initial resources –labour, materials, plant and equipment	30
	Labour	31
	Materials	31
2.17	Site inspection findings	32
2.18	Check conditions of contract award	33
2.19	Obtain licences – local authority and statutory bodies	33
	Considerate Constructor's Scheme	34
2.20	Utilities – connections and permissions	35
2.21	Adjacent structures	36
	Party walls	37
2.22	Off-site production	37
	Building vs installing	38
	Design	38
	Design for Manufacture and Assembly (DfMA)	38
	Quality assurance	39
	Risks	39
2.23	References	40

## 3 Managing the process or production

3.1	Introduction	42
3.2	Preliminaries	42
	Setting out	45
	Information for setting out	45
	Grids	46
	Acceptance	47
	Marking	47
	Measuring	48
	Establishing lines and levels	48
	Safety measures for surveying operations on site	49
3.3	Temporary works	50
	Scaffolding	53
	Scaffold design	54
	Falsework	56
	Formwork	57
	Earthworks	58
	Excavation	58
	Dewatering	59
	Temporary services	60
	Site records	61
	Site services	61
	Insurances and bonds	62
	Compliance	63
3.4	References	63

## 4 Managing health and safety risk

4.1	Introduction	66
4.2	Manager's role in health and safety on site	66
4.3	Construction (Design and Management)	
	CDM Regulations	68
	The Client	69
	The designer	70
	The principal contractor	70
	Health and safety file	71
	CDM Schedules	71
4.4	Risk	72
	Risk assessment	72
	Construction risks	72
	Structural stability	73
4.5	Asbestos	73
	The duty to manage asbestos	74
4.6	Legislation and regulations	75
	Breaches of health and safety	75
4.7	Site establishment	76
	Site facilities	76
4.8	Signage	77
4.9	Personal Protective Equipment (PPE)	77
	Monitoring pollution	79
	Protection from vibration	80
4.10	First aid equipment and materials	81
4.11	Traffic management	81
4.12	References	82

## 5 Managing cost

5.1	Project control and cost monitoring	84
	Assessing and recording performance	84
	The site diary	85
5.2	Monitoring project costs	86
	Cost-value reconciliation	87
	Earned value	87
5.3	Variations to programme specification	87
5.4	Contract variation	88
	Communicating variations and changes	89
5.5	Variation orders	89
	Recording variations	89
	Claims	90
5.6	Contingencies	90
5.8	Managing documents	91
5.9	References	91

## 6 Managing people

6.1	Introduction	94
6.2	Regulations	95
	Health and safety regulations	95
	Labour/Pay regulations	95
6.3	Training	97
	Construction Skills Certification Scheme	97
6.4	Motivation	98
	De-motivation	99
6.5	Supervision	100
6.6	Empowerment/involvement	100
	Government reports and empowerment	101
6.7	Remuneration	102
	Working Rule agreements	102
	Bonus schemes	104
	Absenteeism	104
6.8	References	105

## 7 Managing quality – the role of the site manager

7.1	Introduction	108
	Time Cost Quality triangle	108
7.2	Quality systems, procedures and standards	109
	Quality Management System (QMS)	110
	Total Quality Management (TQM)	110
	Six-Sigma	111
	Quality standards	111
	ISO 9001:2015	111
7.3	Workmanship	112
7.4	Material handling and preparation for work	113
	Specification, quantity and quality requirements	113
	Material compliance to requirements	113
	Purchasing procedure and approved suppliers	114
	Builders' merchants	114
	Cost of Materials	115
	Records and administrative procedures for materials	115
	Deliveries to site	115
	Recording and Monitoring Materials on Site	116
	Protection during construction	116
	Calling forward of materials	117
7.5	Materials Logistics	118
	The Off-site manufactured components	118
	Logistics - deliveries, storage and handling	119
	Design	119
	Design for Manufacture and Assembly (DfMA)	119
7.6	References	120

## 8 Managing time and project planning

8.1	Introduction	122
8.2	Time	124
	Corporate memory	124
	Project memory	124
8.3	Time management	124
8.4	The schedule	125
	Resource levelling	126
	Dependencies	127
	Sequencing	127
	Programme Evaluation and Review Technique (PERT)	127
	Graphical Evaluation and Review Technique (GERT)	128
	Work Breakdown Structure (WBS)	128
	Resource schedule	128
	As-built programme/schedule	128
	Float	128
8.5	Monitoring and control	128
8.6	Recording site events, document and information management	129
8.7	Collaboration tools to manage projects	129
8.8	References	130

## 9 Managing the supply chain

9.1	Introduction	132
9.2	Supply chain agility	133
9.3	Lean thinking	133
9.4	Specialist contractors	134
9.5	Specialty contractors	134
	Domestic specialty contractor	134
	Named specialty contractor	134
	Nominated specialty contractors	135
9.6	Logistics planning	135
9.7	Logistics Plan	136
	Just-in-time delivery (JIT)	136
	Builders' merchants	137
9.8	Supply chain contracts	137
	Ownership of materials	137
	Defects	137
	Design	137
	Specialty contract issues	138
	Dispute resolution	138
9.9	Supply Chain Management software	138
9.10	References	139

## 10 Managing materials, plant and equipment

10.1	Introduction	142
10.2	Procurement	142
10.3	Materials management	143
	Handling	143
	Material flow	143
	Inventory	144
	Material's storage	144
10.4	Materials wastage	145
10.5	Materials security	146
10.6	Materials, plant and equipment health and safety	147
	Materials storage	147
	Attendant labour	147
	Signage	148
	Safety checks	148
10.7	Plant and equipment	149
	Plant procurement – hire or purchase?	149
	Temporary works	149
10.8	Technology	150
10.9	References	151

## 11 Managing waste and environmental issues

11.1	Introduction	154
	Reduce – reuse – recycle	155
	Control of Pollution Act 1974	156
	Section 61	156
11.2	Sustainability	156
	Carbon footprint	156
	Building Research Establishment Environmental Assessment Method (BREEAM)	157
11.3	Pollution/emissions	157
	Noise	157
	Air and ground pollution	158
	Dust	158
11.4	Environmental protection	158
11.5	Legislation	159
	The Town/Country Planning (Environmental Impact Assessment) Regulations 2017	159
11.6	Codes and standards	159
	International Standards Organisation (ISO) 14000	159
	British Standard	159
	Code of Practice	159
11.7	References	160

## 12 Managing the client and design team

12.1	Introduction	162
12.2	CDM requirements	162
12.3	Contractual requirements	162
12.4	Managing client expectations	163
12.5	Managing the design team	163
	The Royal Institute of British Architects (RIBA) Plan of Work	164
12.6	Roles and responsibilities in different forms of procurement	165
	Procurement types	165
	Early contractor involvement	166
	Two stage tendering	166
12.7	References	166

## 13 Managing legal and contractual issues

13.1	Legal issues	168
	Civil Law - legislation	168
	Labour laws and regulations	168
	Health and safety legislation	168
	Environmental	169
	Finance	170
13.2	Criminal Law	170
13.3	Contractual issues	170
	Standard forms of contract	170
	Contract management	171
13.4	References	174

## 14 Managing security

14.1	Introduction	176
14.2	Contract conditions	177
14.3	Theft	177
14.4	Vandalism	177
14.5	Fire	177
	Fire alarms	178
	Fire stopping	178
14.6	Measure use in site security	178
	Crime prevention strategies	178
	Preventing theft	179
	Preventing plant and equipment theft	179
	Preventing vandalism	179
	Preventing fires/arson	179
	Hoardings	179
	Lighting	180
	Alarm systems	180
	Access	180
	Scaffold/plant and ladder protection	180
	Vehicles and plant	180
	Site offices	180
	Small tools and equipment	180
14.7	Technology	181
	Cameras	181
	Equipment/plant/material tagging	181
	Access control	181
14.8	Regulations and standards	181
14.9	Cybersecurity	181
14.10	References	182

## 15 Managing technology

15.1	Introduction	184
15.2	Off-site production	184
	Types of off-site production	184
	The benefits	184
	The challenges	184
	Compliance	185
15.3	New materials and processes	185
15.4	Repair and maintenance projects	185
	R&M project issues	185
15.5	References	186

## 16 Managing ethical issues

16.1	Introduction	188
16.2	Professional ethics	188
16.3	Ethics in business	188
16.4	Ethics in the construction industry	190
16.5	Fraud and bribery	192
	Fraud	192
	Billing fraud	192
	Bid/contract rigging	192
	Bribery/corruption	192
	Fictitious vendors	192
	Change order manipulation	192
	Theft or substitution of materials	192
	False representation	192
	Fraud Act 2006 (UK)	192
	Money laundering/tax avoidance	192
	Bribery	192
	The background	193
16.6	Code of ethics	193
16.7	Ethical sourcing	194
16.8	Social responsibility	194
16.9	Corporate social responsibility	195
16.10	Culture	197
	Organisational culture	192
16.11	Ethics legislation	197
	UK legislation	197
	Bribery act 2010 (UK)	197
	UK competition law	199
	Fraud act 2006 (UK)	199
	Construction sector transparency initiative cost	199
	The modern slavery act	199
	International legislation	200
	The oecd anti bribery convention	200
	World Economic Forum Partnering Against Corruption Initiative (PACI)	200
	Foreign Corrupt Practices Act (USA)	201
	UN global compact, the principles and practice	201
	Sarbane-oxley act	201
16.12	Whistle-blower provisions and protection	202
16.13	References and bibliography	202

## 17 Managing post-completion requirements

17.1	Introduction	206
17.2	Pre-completion inspection	206
	Partial possession	206
17.3	Practical completion	206
	A building owner's manual	207
	Health and safety file	207
	Building log book	207
	Construction stage report	208
17.4	Defects	208
17.5	Handover	208
	Commissioning	209
	'Hard' and 'soft' handovers	209
	Government Soft Landings (GSL)	210
	Lessons learned	210
17.6	Facilities management	212
17.7	Beyond completion – lessons learned	212
17.8	References	213
